

Myself and my family listen to K-LOVE (106.7) here in Danville, VA. I have hoped for years that my children would have an alternative to the music that they heard on the radio. We had those options when we lived in Atlanta. When two Christian stations came into our community it gave me an alternative for myself and them. I knew the impact of music on today's kids and I wanted something more positive and upbeat. I hate to think what your decision to displace these stations with LPFM will do to our signal and our alternative to other music. Please consider the service that K-LOVE provides and know that is really is in the best interest of the public to have other options to choose from. If it keeps going the way it is our only choice will be to drop radio all together and use tapes and CDs. I know as an advertiser with local radio in our community that the number of listeners and the impact of radio is lessening all over the country. In fact the corporate branch of my company no longer chooses or supports their advertising dollars in radio. You need to make wise choices for a lot of reasons but do not take away a positive alternative and leave us one more reason not to choose radio as a listening option. Thank you.
